## The Calendar-Sky

The astronomical calendar contains **thousands of events per day** for every point on Earth. We know that you only care for a very few of these events and hence we let you personalize your own Astro-Calendar. You may primarily do so by switching to your appropriate user level, and by selecting some of the three dozens categories.

In parentheses are forced limits for the maximum calculation interval. The celestial calendar is to be found further below on this page and will appear within some seconds after pressing the *Go!*-Button (depending on the complexity of your selections). The calendar is created especially for you. The higher your user level, the more complex objects you selected, the longer it does take to calculate. *Please do not press the reload-button*; the calculations will take significantly longer.

#### Calendar and Timekeeping

- Space Calendar:
- Birthdays, Rocket Launches
- Local Events (Talks, Exhibitions)
- NASA TV Guide
- Local Telescope Dealers
- Public Holidays
- Saint's Day
- Zodiac of today.
- Change of Zodiac Islamic, Indian,
- Persian and Hebrew Calendar
- Week Number
- Sundials / GPS
- Time / Current Time Definitions
- Julian Day Number
- Sidereal Time
- Local Magnetic Field

#### General events

- Lunar Occultations (2 months)
- Planetary Conjunctions
- Lunar Eclipses
- Solar Eclipses and Transits
- Meteor Streams
- Planetary Phenomena
- Lunar Phenomena
- The Sun
- Asteroids (6 months)
- Comets

#### Earth orbiting satellites

- Space Station ISS (1 month) short duration
- Flares of Iridium satellites (14 days)
- Passes of other bright satellites (7 days, slow!)

#### Daily reoccurring events

- Sun and Moon
- Planets
- Asteroids
- Comets
- Meteor Streams
- Polar Star Transits
- Weather Balloons

#### Dimmer and more difficult objects

- Jupiter: Great Red Spot and satellite events
  - Jupiter's Satellites: position
  - Saturn: Satellite events and storms
  - Saturn's Satellites: position
  - Zodiacal light/Gegenschein
  - Variable Stars (3 months)
  - Supernovae
  - Binary Stars
- #### Deep sky objects
- Milky Way
  - Galaxies
  - Open Star Clusters
  - Globular Star Clusters
  - Nebula

## Sunday 17 February 2013
